## **Ad hoc announcement**

### **DF Deutsche Forfait AG achieves strong half-year result and adjusts 2022 annual forecast**

Grünwald, 22 September 2022, 15:50 CET/CEST – DF Deutsche Forfait AG (ISIN of the share: DE000A2AA204) announces that the preliminary and unaudited consolidated profit before tax for the first half of 2022 has increased by approximately 30 per cent compared to the first half of 2021. The deviation results from an improved gross profit compared to the same period of the previous year with almost unchanged administrative expenses.

In line with the development of the operating business in the first half of 2022, DF Deutsche Forfait AG is adjusting the forecast for the full year 2022. The Board of Management now expects a strong increase in the gross result and the consolidated result before taxes for the current financial year. Previously, a slight increase in gross profit and consolidated profit before tax had been assumed.

The publication of the half-year financial report is planned for the end of September 2022.
